Coordinator Dashboard Help — Standalone HTML

Actual elements side-by-side with plain-English explanations. Pure HTML/CSS for review — we'll integrate into the app once you confirm it's correct.

Color Legend (Patient Activity)

Green: Seen in the last 30 days

Yellow: Seen 1–2 months ago

Red: NOT seen in 2+ months

Blue: ≥200 minutes this month

My Patients — Coordinator Panel

Status	First Name	Last Name	Facility	Provider	Last Visit Date	Ser
Active	Ada	Lopez	Autumn Ridge	Dr. Park	2025-10-28	PCI
Active	Ben	Kim	Summit Care	Dr. Singh	2025-09-28	PCI
Gap >60d	Carla	Nguyen	Sunset Home	Dr. Lee	2025-08-20	PCI

Status: Current engagement or gaps; color reflects last-visit recency.

Facility: Patient location/residence.

Provider: Assigned primary provider for care coordination.

Last Visit Date: Drives color coding (Green ≤30d, Yellow 31–60d, Red ≥61d).

Service Type: e.g., PCP, Specialty; informs who to coordinate with.

POC-A: Administrative Plan of Care status (consents/docs/tasks).

POC-M: Medical Plan of Care status (clinical goals/plan alignment).

Mins: Monthly engagement minutes; blue badge indicates ≥200.

Use sorting/filters to triage gaps; coordinate with provider and facility to close loops.

Workflow Manager — Quick Start

Template ?

Onboarding Pack

Select the workflow to launch; steps auto-populate.

Start Date ?

11/21/2025

Sets due dates relative to this anchor.

Patient ?

Ada Lopez

Coordinator ?

Current User

Start Workflow (disabled)

Starts the selected workflow with scheduled steps. Disabled here for demonstration.

Template: Defines steps, owners, and default due dates.

Start Date: Schedules downstream tasks.

Coordinator: Receives reminders and owns completion.

Patient: Ensures context for records and communications.

Ongoing Workflows — Monitor & Actions

Workflow	Patient	Coordinator	Started	Completed/Total Steps	A
Onboarding Pack	Ada Lopez	Sarah Johnson	2025-11-05	3/6	
Records Request	Ben Kim	Alex Rivera	2025-11-12	1/4	

Completed/Total: Progress indicator for workflow steps.

Actions: Manage workflow state (read-only here).

Monitoring: Use filters/sorting to prioritize attention.

Task Entry — Coordinator

Date ?

mm/dd/yyyy

Patient ?

Ada Lopez

Task Type ?

Intake Call

Duration (minutes) ?

15

Notes ?

Call summary, records requested, coordination details...

Coordinator Task Notes — What to write:

- Contact method and participants (phone, in-person, facility staff).
- Purpose and brief summary of actions.
- Outcome and any escalations or provider notifications.
- Next steps and due dates; who owns them.

Example: "Intake call with daughter and facility RN. Confirmed contact info; requested records (med list, discharge summary). Escalated med discrepancy to provider via portal message. Next: schedule PCP tele-visit; due in 3 days."

Log Task (disabled)

Saved to coordinator tasks in the live app; required fields enforced. Disabled here for demonstration.

Validation: Required fields must be completed.

Persistence: Writes to coordinator task records for reporting.

Use Cases: Intake calls, scheduling, record requests, general care coordination.

If this layout and wording match your expectations, we'll embed it into Coordinator Help tabs and wire examples to live data (read-only), with optional Sandbox mode.
