# Provider Dashboard Help — Standalone HTML

This page shows the actual elements side-by-side with plain-English explanations. No Streamlit here — pure HTML/CSS for review. We will integrate this into the app once you confirm it's correct.

## Color Legend (Patient Activity)

**Green**: Seen in the last 30 days

**Yellow**: Seen 1–2 months ago

**Red**: NOT seen in 2+ months

**Blue**: ≥200 minutes this month

---

## My Patients — Panel

| Status | GOC | Code Status | First Name | Last Name | Facility | As |
|---|---|---|---|---|---|---|
| Active | Rev/Confirm | Full Code | Ada | Lopez | Autumn Ridge | Sa |
| Active | Discuss | DNR | Ben | Kim | Summit Care | Al |
| Gap >60d | Discuss | DNR | Carla | Nguyen | Sunset Home | Ja |

**Status:** Current engagement or gaps.

**GOC:** Goals of Care status (Rev/Confirm/Discuss).

**Code Status:** Resuscitation preference (e.g., Full, DNR).

**Facility:** Where the patient resides.

**Assigned Coordinator:** Primary point of contact.

**Last Visit Date:** Drives color: Green ≤30d, Yellow 31–60d, Red ≥61d.

**Service Type:** e.g., PCP.

**Phone Number:** Primary contact.

**Minutes (Blue badge):** Monthly minutes; blue indicates ≥200.

Sorting and filtering in the real panel help triage gaps; coordinate with the assigned coordinator for actions.

---

## Onboarding Queue & Initial TV Visit

## Onboarding Queue & Initial TV Visit

Visit Type ?

Initial TV

Select the visit classification used for onboarding and documentation.

Modality ?

Home Visit

Use Modality to distinguish in-person vs remote visits; Visit Type captures purpose.

Date ?

11/21/2025

Enter the completion date of the visit, not the documentation date.

Visit Notes ?

Summary of assessment and plan; key findings; next steps...

Include assessment findings, interventions, patient response, and plan.

**Notes — What to write:**

- Reason for visit and context (e.g., intake, care plan review).
- Key findings: code/cognitive/functional, mental health concerns, major issues.
- Interventions/orders and education/counseling provided.

- Risk rationale for chosen Subjective Risk Level.
- Follow-ups, referrals, and next steps.

Example: "Initial TV (Telehealth). Confirmed DNR; cognitive intact; independent ADLs. Reviewed meds; counseled on fall risks. Risk: Moderate due to 1 ER visit in 12 mo. Plan: home visit in 2 weeks; refer to PT; coordinator to schedule."

Mental Health Concerns ?

- [ ] Anxiety
- [ ] Depression
- [ ] PTSD
- [ ] Substance Use

Multi-select all applicable; use clinical judgment for suspected vs confirmed.

Code Status ?

Full Code

If uncertain, use "Unknown/Review needed" and follow up.

Cognitive Function ?

e.g., Intact; oriented x3

Brief descriptor; add screening scores if available.

Functional Status ?

e.g., Independent with ADLs; needs help with IADLs

Summarize ADLs vs IADLs as appropriate.

GOC Status (Goals of Care) ?

New

Use Confirm when existing goals are reviewed and affirmed; Revise when changes are needed.

Subjective Risk Level ?

Low

Consider ER/hospital use, MH, social determinants, adherence.

Goals of Care (Narrative) ?

Patient goals, priorities, preferences...

Concise, specific, actionable statements.

Active Concerns ?

Prioritized concerns to address...

List current issues and prioritize as needed.

Active Specialists ?

Specialty, provider name, contact, last visit...

Record specialty, provider contact, and relevance.

ER Visits/Hospitalizations (12 mo) ?

0

Enter the count; optional details below.

Utilization Details ?

Dates, reasons, facilities...

Provide context to inform risk and planning.

Schedule Visit

Completing the initial TV updates onboarding/patient records and removes the patient from the queue. This button is disabled on the help page.

Field Explanations

- Visit Type: Clinical purpose (Initial TV, Intake Follow-up, Care Plan Review).
- Modality: In-person Home Visit vs Telehealth; separate from Visit Type.
- Date: When the visit occurred; drives recency/overdue logic.
- Visit Notes: Clinical narrative: assessment, response, and plan.
- Mental Health: Multi-select relevant conditions impacting care.
- Code Status: Resuscitation preference documented in chart.
- Cognitive/Functional: Baseline profiles guiding communication and services.
- GOC Status: New/Revise/Confirm/Established/Needs Review vocabulary.
- Subjective Risk Level: Low/Moderate/High/Critical based on provider impression.
- Goals of Care: Patient-centered goals for the care plan.
- Active Concerns: Prioritized issues to address.
- Active Specialists: Current specialist involvement and contacts.

- ER/Hospitalizations (12 mo): Count and optional details; informs risk.
- Schedule Visit: In live app, saves and removes from onboarding queue when Initial TV complete.

**ER Visits/Hospitalizations (12 mo):** Captured during intake.

**Subjective Risk Level:** Provider's risk impression.

**Code/Cognitive/Functional:** Baseline profile.

**GOC & Goals of Care:** Status and narrative.

**Active Concerns/Specialists:** Context for care coordination.

## Phone Reviews — Entry Form

Task Type

Phone Review

Choose appropriate call/review type.

Date

mm/dd/yyyy

When the call took place.

Notes

Call summary, clinical updates, next steps...

Key updates and future actions.

**Phone Review Notes — What to write:**

- Call purpose and context.
- Symptoms/updates, medication adherence/issues.
- Actions taken (advice, orders, coordination initiated).
- Next steps (appointments, referrals, monitoring plan).

Example: "Follow-up call re: BP and dizziness. Adherent to meds; reports intermittent dizziness when standing. Advised orthostatic precautions; coordinator to schedule PCP tele-visit. Plan: monitor BP daily; call if worsening."

Log Task (disabled)

Required fields are validated in the live form. Saved to provider_tasks for reporting.

**Validation:** Required fields enforced.

**Persistence:** Saved to provider_tasks for reporting.

**Use Case:** Document tele-visit phone reviews and follow-ups.

---

## Task Review — Summary

Start Date

mm/dd/yyyy

End Date

mm/dd/yyyy

Task

Phone Review
PCP-Visit Home Visit (HV)

Hold Ctrl/Cmd to select multiple.

Status

Queued

Export CSV (disabled)

| Task | Date | Minutes | Status | Notes |
|---|---|---|---|---|
| PCP-Visit Home Visit (HV) | 2025-11-10 | 45 | Completed | Initial HV completed |
| Phone Review | 2025-11-18 | 15 | Queued | Call scheduled |

**Columns:** Task, Date, Minutes, Status, Notes.

**Filters:** Date range, Task, Status.

**Export:** Download CSV for analysis.
