Provider Dashboard Help — Standalone HTML

This page shows the actual elements side-by-side with plain-English explanations. No Streamlit here — pure HTML/CSS for review. We will integrate this into the app once you confirm it's correct.

Color Legend (Patient Activity)

Green: Seen in the last 30 days

Yellow: Seen 1–2 months ago

Red: NOT seen in 2+ months

Blue: ≥200 minutes this month

My Patients — Panel

Status	GOC	Code Status	First Name	Last Name	Facility	As
Active	Rev/Confirm	Full Code	Ada	Lopez	Autumn Ridge	Sa
Active	Discuss	DNR	Ben	Kim	Summit Care	Al
Gap >60d	Discuss	DNR	Carla	Nguyen	Sunset Home	Ja

Status: Current engagement or gaps.

GOC: Goals of Care status (Rev/Confirm/Discuss).

Code Status: Resuscitation preference (e.g., Full, DNR).

Facility: Where the patient resides.

Assigned Coordinator: Primary point of contact.

Last Visit Date: Drives color: Green ≤30d, Yellow 31–60d, Red ≥61d.

Service Type: e.g., PCP.

Phone Number: Primary contact.

Minutes (Blue badge): Monthly minutes; blue indicates ≥200.

Sorting and filtering in the real panel help triage gaps; coordinate with the assigned coordinator for actions.

Onboarding Queue & Initial TV Visit

Onboarding Queue & Initial TV Visit

Visit Type ?

Initial TV

Select the visit classification used for onboarding and documentation.

Modality ?

Home Visit

Use Modality to distinguish in-person vs remote visits; Visit Type captures purpose.

Date ?

11/21/2025

Enter the completion date of the visit, not the documentation date.

Visit Notes ?

Summary of assessment and plan; key findings; next steps...

Include assessment findings, interventions, patient response, and plan.

Notes — What to write:

- Reason for visit and context (e.g., intake, care plan review).
- Key findings: code/cognitive/functional, mental health concerns, major issues.
- Interventions/orders and education/counseling provided.
- Risk rationale for chosen Subjective Risk Level.
- Follow-ups, referrals, and next steps.

Example: "Initial TV (Telehealth). Confirmed DNR; cognitive intact; independent ADLs. Reviewed meds; counseled on fall risks. Risk: Moderate due to 1 ER visit in 12 mo. Plan: home visit in 2 weeks; refer to PT; coordinator to schedule."

Mental Health Concerns ?

- [ ] Anxiety
- [ ] Depression
- [ ] PTSD

☐ Substance Use

Multi-select all applicable; use clinical judgment for suspected vs confirmed.

Code Status ?

Full Code

If uncertain, use "Unknown/Review needed" and follow up.

Cognitive Function ?

e.g., Intact; oriented x3

Brief descriptor; add screening scores if available.

Functional Status ?

e.g., Independent with ADLs; needs help with IADLs

Summarize ADLs vs IADLs as appropriate.

GOC Status (Goals of Care) ?

New

Use Confirm when existing goals are reviewed and affirmed; Revise when changes are needed.

Subjective Risk Level ?

Low

Consider ER/hospital use, MH, social determinants, adherence.

Goals of Care (Narrative) ?

Patient goals, priorities, preferences...

Concise, specific, actionable statements.

Active Concerns ?

Prioritized concerns to address...

List current issues and prioritize as needed.

Active Specialists ?

Specialty, provider name, contact, last visit...

Record specialty, provider contact, and relevance.

ER Visits/Hospitalizations (12 mo) ?

0

Enter the count; optional details below.

Utilization Details ?

Dates, reasons, facilities...

Provide context to inform risk and planning.

Schedule Visit

Completing the initial TV updates onboarding/patient records and removes the patient from the queue. This button is disabled on the help page.

Field Explanations

- Visit Type: Clinical purpose (Initial TV, Intake Follow-up, Care Plan Review).
- Modality: In-person Home Visit vs Telehealth; separate from Visit Type.
- Date: When the visit occurred; drives recency/overdue logic.
- Visit Notes: Clinical narrative: assessment, response, and plan.
- Mental Health: Multi-select relevant conditions impacting care.
- Code Status: Resuscitation preference documented in chart.
- Cognitive/Functional: Baseline profiles guiding communication and services.
- GOC Status: New/Revise/Confirm/Established/Needs Review vocabulary.
- Subjective Risk Level: Low/Moderate/High/Critical based on provider impression.
- Goals of Care: Patient-centered goals for the care plan.
- Active Concerns: Prioritized issues to address.
- Active Specialists: Current specialist involvement and contacts.
- ER/Hospitalizations (12 mo): Count and optional details; informs risk.
- Schedule Visit: In live app, saves and removes from onboarding queue when Initial TV complete.

ER Visits/Hospitalizations (12 mo): Captured during intake.

Subjective Risk Level: Provider's risk impression.

Code/Cognitive/Functional: Baseline profile.

GOC & Goals of Care: Status and narrative.

Active Concerns/Specialists: Context for care coordination.

Phone Reviews — Entry Form

Task Type

Phone Review

Choose appropriate call/review type.

Date

mm/dd/yyyy

When the call took place.

Notes

Call summary, clinical updates, next steps...

Key updates and future actions.

Phone Review Notes — What to write:

- Call purpose and context.
- Symptoms/updates, medication adherence/issues.
- Actions taken (advice, orders, coordination initiated).
- Next steps (appointments, referrals, monitoring plan).

Example: "Follow-up call re: BP and dizziness. Adherent to meds; reports intermittent dizziness when standing. Advised orthostatic precautions; coordinator to schedule PCP tele-visit. Plan: monitor BP daily; call if worsening."

Log Task (disabled)

Required fields are validated in the live form. Saved to provider_tasks for reporting.

Validation: Required fields enforced.

Persistence: Saved to provider_tasks for reporting.

Use Case: Document tele-visit phone reviews and follow-ups.

Task Review — Summary
